1993 was another mediocre skip year, much like last year. In fact, note below how close statistically the two seasons were, within 17 total loggings, and the same number of days. And in both seasons June was the best month, although June dominated even more this year, with 66% of the total loggings coming in that month. It was the 2nd best June of the past 10 years. May was by far the most dismal showing that month has ever put out, with only 57 total loggings thw whole month, which is less than the average number of loggings per day in June! The best periods were mid to early June, and early July, before really tapering off in late July. One notable absence this year was the lack of a widespread "monster" opening; this year's leading skip day, June 12, netted 297 loggings, which would put it only 4th place last year, hardly a banner yer in itself. And no FM opening this year was heard by more than 18 DXers, while 26 was the high last year. Despite this, there were enough mediocre openings to at least salvage the season. The average number of loggings per skip opening was strikingly similar to last year's average: only a difference of 0.25 loggings!

## 1993 FM E-skip report.

### THE TOP 20 OPENINGS IN 1993.

Note: Openings in October and November not included in these totals  
Reports taken from Northern and Southern FM DX up to the December 93 issue  
Special thanks to Doug Smith for assistance compiling this report!

Katy, TX: KNWS 51+  
2560kW/294m  
TL 29°35'20"N, 95°33'26"W  
in the tower farm south of Houston.  
Seen by Jeff Kruszka on Nov. 19, who says they went on the air on Nov. 3. This is an independent station with an all-news format.

## OTHER STUFF

The San Francisco and Santa Ana new station applications are mutually exclusive with existing KMTP-32 and KTBN-40 respectively. The Albion, Nebraska application is made possible by the pending move of KCAN-8 to Lincoln, and the resulting new allocation of channel 18 to Albion. The Iron Mountain call letter change is actually a year old, it never cleared my source. (I'm planning on changing sources early next year...)

Looking at December LPTV Watch, Fred McCormack believes the K14AQ calls for the Billings TBN are wrong, with that LPTV having been deleted in 1991. K05HS (the first TBN in Billings) was granted a CP to move to channel 14 in May 1993, but calls weren't given. (it's possible that, until a final license is granted, the correct calls for channel 14 are K05HS!)

The Supreme Court will begin hearings on the constitutionality of the must-carry provisions of the

## (Other Stuff, contd.)

Cable Act on January 12. The Justice Department, FCC, and National Association of Broadcasters support the rules; cable interests oppose them.

An article in the Dec. 13 issue of *Broadcasting and Cable* indicates that ethnic-formatted W23AT Chicago is using the "non-ID" WFMT. Indeed, the article never mentions the W23AT calls!

Boston University, which recently purchased WQTV-68 (now apparently WABU-68) and WCVX-58 Vineyard Haven, has now also purchased WNHT-21 Concord, New Hampshire. GM Robert Gordon says the purchase was made to "achieve signal coverage parity".

Another station has been purchased by home-shopping network ValueVision. This time, it's ABC affiliate WAKC-23 Akron/Cleveland, which we can probably expect to switch to home shopping.

The shortest commercial ever has aired on KING-5 Seattle. The candy commercial was solicited by KING's *Evening Magazine* program, which wanted to air the shortest & most expensive spot. The commercial lasted four frames (there are 30 TV frames in a second...) and cost \$3,780; extrapolated to a 30-second commercial, it would cost \$28,350, \$17 more than the most expensive spot in last year's Super Bowl...

## FORUM

Neil Griffin, Kirksville MO:

Neil sent a brief E-mail indicating that KTVO-3's re-transmission problems in Kirksville have been solved. The station signed a no-compensation agreement for carriage until Jan. 15, 1995. "Station manager Bob Kizer said the reason was that the viewers were caught in the middle, and the fact that the station was unavailable to those in hospitals and nursing homes (no mention of dormitories with brick and steel construction!). That leaves KTVO off cable systems in Macon and Marceline, Missouri and Lockridge, Iowa."

John Zeis, Exton PA:

John writes about new TBN activity in his area: "W40AZ, Wilmington, DE began operation 12 November." "The transmitter is north of Wilmington, just south of the PA-DE border. May be using a directional antenna as the signal here (16mi. NNW) is fairly snowy. The choice of channel is strange with only a 63 mile separation from WMGM, Wildwood-Atlantic City. Cochannel interference is almost constant here."

John (and several other writers, including myself) noticed TBN running a fund drive, attempting to raise money for 60 additional stations. He noticed Nashville on the list- weird, as WPGD-50 and W36AK already cover this city pretty well. Unless they want to spend the money to replace W36AK's transmitter with something that won't go off the air every other week!

The TBN announcer said "TBN no longer builds low power stations, but all will be 'Medium Power' with 1000 watt transmitters. Each will cost \$100,000 to \$120,000." Well, TBN can call them "medium power" but in the eyes of the FCC, 1000w is still a LPTV! Still, the CBA (trade association of LPTVs) may want to take note; they've been trying to distance themselves from the "low power" label, this may be the way to do it!

Fred McCormack, St. Paul MN:

Fred has provided quite a bit of LPTV info, as well as leads on several of the off-the-air stations in the list at the end of the column. (including several that don't appear on the list because he confirmed they're on!)

(Forum, Fred McCormack, contd.)

Also, with regard to Matt's & my notes about IDing home-shopping stations, Fred says ValueVision (carried in Minneapolis on K07UI and K62BD) can be identified by the phone number 1-800-788-2454. They keep a logo in the lower right corner of the screen, but the phone number is easier to read. Both HSS and HSC can be seen over the air in the Minneapolis area, HSS on K35CY and HSC on KXLI-41.

Bill Nienajadly, Clifton NJ:

This month's pick clipping... from the Sept. 27 Wall St. Journal.. "In Britain, unlicensed telly watching is a crime..."

The article details the work of a despised division of the British Post Office, the unit that enforces the requirement that all TVs be licensed. Yes, in Britain you must have a license not only for a TV transmitter, but for a receiver. Revenues from the \$125 annual license fee support the BBC, allowing it to operate without commercials.

This license enforcement unit has been quite successful of late, catching as many as 1,000 unlicensed sets a day. (they still estimate there to be 1,700,000 unlicensed sets, about 13% of all homes in the country)

Blind people have been convicted of owning unlicensed sets; so have recent immigrants who spoke no English, had no antenna, and used the set only to watch videotapes from their native countries. Further, one can be convicted for watching an unlicensed set at someone else's home, even if your own set is licensed! About the only excuse that does work is if the unlicensed TV doesn't work.

The license police use two tactics to find outlaws. The most efficient is a computer database; it contains the address of all 24million UK households, and cross-references it against license holders, providing a regular list of households with no license, or a license about to expire. Another, higher-tech, method is a "Television Detection" van. This unit can determine whether a TV is operating in a given home, and if so, to which channel it's tuned. While the article doesn't say so, I'm sure this is done by detecting leakage from the set's local oscillator- it has been rumored that ratings services here in the USA have tried similar schemes to determine who's watching what channel.

Another item supplied by Bill notes that a TV violence code has been

voluntarily adopted by Canadian TV stations. While compliance with the code is voluntary, the CRTC can look at compliance when deciding whether to renew a given stations' license.

Dave Pomeroy, Topeka KS:

Dave wrote from "the road" in a Dallas-area motel room to confirm that KLDI-55 is, in fact, on the air. "I saw it in Topeka on Sept. 28 and telephoned them while in Dallas. They indicate they are on the air 24hrs. with their transmitter near Lewisville. (NW of Dallas, near Lake Dallas)" Fred McCormack says he's heard from Robert Delaney that Home Shopping Spree has been seen on this station.

Jerry Stuart, Lawton OK:

Jerry sent in a bunch of LPTV info. Some more notes on that subject from him: "Off air: K53DS- owned by KJTV ch. 18, was used for same (HSN?) as K35BO but could not get on Lawton Cablevision & was taken off air. License & transmitter were offered to Lawton Public Schools who said no, due to pressure from CATV."

"We do have a PBS translator on 36 rebroadcasting ch. 13 from Oklahoma City (KETA) but have never found their call. Also, channel 54 Duncan, same as ch. 36." (these are K36AB and K54BB, respectively-ds) Jerry has also seen a Channel America on 62 in San Antonio- I have nothing on this station.

Keith Short, Columbus OH:

WSYX-6's new tower is on the air, as of Oct. 11. "Unless a news event intervenes, Channel 6 will open the newscast with a live shot of Connelly symbolically throwing a switch. (a technician in the control room will activate the real one.)" On that date, at the beginning of their 6PM newscast, the station began broadcasting from a new 1000' tower in Green Lawn Cemetery, replacing a 750' tower on the Ohio State University campus. VP Terry Connelly told the Columbus Dispatch the new tower cost \$3million and required four years of negotiation with federal, state, and local governments.

The Oct. 16 Chillicothe Gazette noted that WWAT-53 there has been sold to Fant Broadcasting of Alabama for \$2million. Keith asks "With WWAT-TV changing hands, what kind of programming can I expect to see in the coming months?"

(Forum, Keith Short, contd.)

Does anybody know what kind of programming WNAL-TV (Fant Broadcasting's other station) carries?" Last time I saw it, WNAL-TV was a semi-satellite of Fox affiliate WTOO-21 Birmingham; before the LMA which resulted in this relay situation was signed, WNAL was a regular independent serving Birmingham, as well as Gadsden and Anniston. I don't expect any major change in direction for WWAT.

Closed-captioning, which makes TV accessible to the deaf, is now fairly well established. Now, WOSU-34 is making TV accessible to the blind. The PBS affiliate is beginning to offer "Descriptive Video Service". This service uses the Second Audio Program- SAP- function on stereo TVs to provide a verbal description of physical gestures, facial expressions, and geographical settings. The first program to be presented is "Porgy & Bess", with other PBS drama and nature programs to follow.

On the retransmission-consent front, all Columbus stations reached an agreement. WBNS-10 actually selected must-carry & didn't ask for any compensation. WTTE-28 signed a 60-day extension after failing to get local cable systems to sign on to the standard Fox agreement. Reportedly, WCMH-4 asked for a second channel for an all-news program but failed to get it. Cable representatives told the *Dispatch* that WCMH and WSYX-6 have settled for news headline inserts on cable channels including CNBC and the Weather Channel.

Tom Bryant, Nashville TN:

Wilson Co. Chancellor (judge) C.K. Smith has given Dr. Joe Bryant another chance to auction his stock in WJFB-66. If this second auction is no more successful than the first, 1991, auction, Jim Owens, producer of the TNN program *Crook and Chase* could be liable for \$1.5million. A *Nashville Banner* article says Owens bought 49% of the station in 1990. However, Bryant said Owens stopped paying for his 49% in 1991, and Bryant was forced to sell his stock for \$250,000 at auction. Owens claims he owes nothing, and that the low price obtained by Bryant was because of poor handling of the sale- the station wasn't advertised in any broadcasting publications, only the *Lebanon Democrat*. WJFB has been dark since April 1991, when the transmitter was disabled by lightning.

In another *Banner* article, WDCN-8, Nashville's PBS affiliate, is

asking Metro government for four additional full-time channels on the cable system here. One would carry rebroadcasts of PBS shows, foreign-language programming, and Congressional hearings. A second would carry adult-education and professional development courses. The third would air instructional programs for children, and the fourth instructional programs for older students. In addition, WDCN plans to expand its channel 8 operations to 24 hours. (it currently broadcasts from roughly 7AM to 11PM)

Viacom Cable, which is negotiating for an early franchise renewal, doesn't seem favorably inclined to the proposal.

Finally, the leader of Prairie Public Broadcasting (North Dakota) is dead. Dennis Falk died of cancer in mid-November; he'd expanded the system from one TV station in Fargo to the current seven TV and five radio stations. Tom knew Falk & says he was very DXer-friendly.

Keith Smith, St. Ann MO:

An unconfirmed report in the Nov. 28 *St. Louis Post-Dispatch* notes that River City Broadcasting is buying KRRT-35 Kerrville/San Antonio. Reportedly, if the deal is completed, River City would then affiliate its other stations (WTTV-4/WTTK-29 Indianapolis and KABB-29 San Antonio) with the new Paramount network. (I believe River City would be allowed to control both KABB and KRRT because KRRT's transmitter is far enough west of San Antonio that coverage overlap doesn't violate FCC standards.)

From the Nov. 24 *Post-Dispatch* (and the AP), a federal appeals court has struck down a FCC regulation (mandated by Congress) prohibiting airing of "indecent" programs on radio and TV between 6AM and midnight. The regulation was ruled "an un-constitutionally broad encroachment on free speech".

Keith asks whether this means we'll be seeing people having sex, or "cutthroat" violence, on regular TV? I doubt it. First, this ruling applies only to "indecent"- "obscene" programming continues to be prohibited. I'm not going to try to put an absolute definition on the difference (if government lawyers can't, I sure can't!) but in general, anything X-rated continues to be proscribed for TV.

(Forum, Keith Smith, contd.)

Secondly, there's the business side to consider. Utterly "clean" family fare may not score too well in the ratings- but extremely "dirty" programs will also turn off enough viewers to probably prove economically unfeasible.

During Thanksgiving week, Keith saw TBN preempt "Praise the Lord" not with fundraising spiels- but movies! He doesn't say exactly what kind of movies, but I gather they weren't specifically religious in nature?

Both Keith and Greg Coniglio mention a controversial Canadian murder case. A judge (fearing he'd have trouble finding an unbiased jury?) issued a "gag order" prohibiting publicity on the case. Reportedly, Canadian border police actually arrested some people for attempting to bring copies of the *Buffalo (NY) News*, with articles on the case, into Ontario.

While of course a Canadian judge has no authority to restrict what's aired on U.S. broadcast stations, WGRZ-2 agreed to "black out" *Current Affair* and *Now* stories on the subject; indeed, a total of 16 NBC affiliates near the border agreed to black out parts of the *Now* story. And, some Ontario cable systems have now at least temporarily dropped U.S. stations which might carry the story.

Greg Coniglio says he's read that the CRTC is unhappy with Canadian TV and cable for the blackouts, charging censorship! Quoting Greg, "...I have been told the rumors going around Southern Ontario as a result of the ban are worse than the truth is!"

Finally, Keith wants to know if any stations besides KNLC-24 carry the World Harvest TV program "The American Times"?

Dave Sinclair, Vancouver BC:  
(via Fred McCormack)

Dave has heard that the CRTC will hold hearings for licenses for new TV stations in Edmonton and Calgary this month.

He also passes along an article from the Nov. 12 *Vancouver Sun* in which two local hospitals evicted unauthorized equipment which had been placed in their basements by Rogers Cable. The equipment assisted Rogers in relaying data and audio signals for several Vancouver businesses, radio stations, and the CBC. Hospital spokesmen told the *Sun* they were first aware of the equipment when Rogers

technicians, who are on strike, threatened to picket the hospitals unless the gear was removed.

Lawrence Marecki, Cleveland OH:

The NFL/bar battle over pickup of blacked-out football games continues in Cleveland. In past years, the NFL has successfully prevented the showing of satellite feeds of football games in public places. In response, many bars have installed large antennas, with which to receive the games from "unblacked-out" stations in other cities.

Now, according to articles in the *Cleveland Plain Dealer* (great name for a paper!) the NFL is suing to attempt to stop this method. In mid-October, hearings were held in U.S. District Court to attempt to determine what makes a "common household antenna".

NFL expert Jack Hurray surveyed 624 outdoor antennas near the bars & found 6% had 10 or more elements, "the metal prongs that improve the reception qualities of an antenna". He said a "common antenna" has four or five elements and is 4-5' long. The antennas on the bars had 9 or more elements & were 7-10' long.

The bar owners hired their own expert, Walter Glazer. Glazer surveyed 420,000 northeast Ohio households with outdoor antennas (it may be a good sign for TV DXing that there still are 420,000 northeast Ohio households with outdoor antennas!) and found that 40% can receive broadcasts from Toledo, Erie, Detroit, Columbus, and/or Pittsburgh.

## DARK STATIONS?

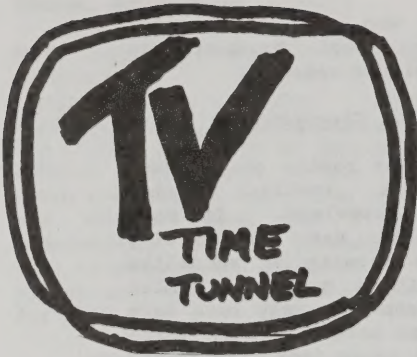

Can anyone tell me if any of the below stations are on the air- or if any U.S. VHF stations not on this list are off? Thanks!

KOFT-3 Gallup	KZJC-4 Flagstaff
KLXO-7 El Centro	KRBQ-7 Sheridan
WWFD-8 Key West	WDHS-8 Iron Mtn.
WSVI-8 Christiansted	
KZXC-9 Anchorage	KVPY-9 Flagstaff
KUSM-9 Bozeman	WSUR-9 Ponce
KHBB-10 Helena	KTRG-10 Del Rio
WBNB-10 Charlotte	Amalie
KCHF-11 Santa Fe	KRXI-11 Reno
WLII-11 Caguas	WOLE-12 Aguadilla
KUSG-12 St. George	
WTJX-12 Charlotte	Amalie

These are VHF stations which have never been reported to the DX columns.

*[Handwritten signature]*

PREPARED FOR THE WTFDA BY TOM BRYANT, NASHVILLE, TN. THANKS TO WTFDAer TOM YINGLING FOR SENDING IT TO "TIME TUNNEL".

This listing of 'post-freeze' allocations which became effective April 14, 1952 makes for a fascinating study of long-term spectrum use by U.S. tv broadcasters. What has changed...and what hasn't during the past 40 years are of almost equal interest. (Reprinted from a National Radio Institute article authored by Mr. John Battison.)

More from Jeff next time.

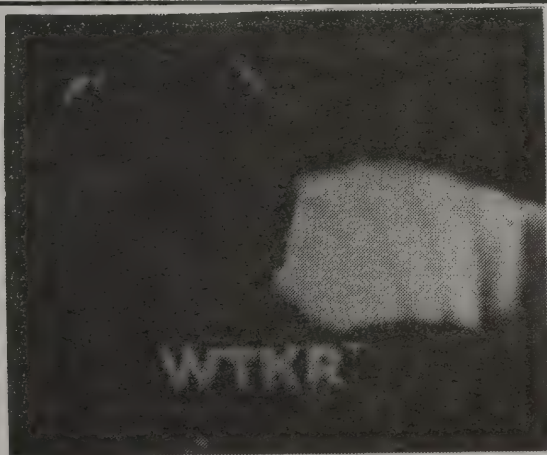

Tom Bryant -Nashville Tennessee (DX from Napoleon North Dakota) Equipment: ancient TV set, local cable system antennas on city water tower. "Enclosed pix is of CKY-tv (7) Winnipeg taken on the ancient set in room #1 of the Fettig Motel in Napoleon, ND (my home town) . I was there for a class reunion and found this mixing with KQCD-tv (7) (Dickinson, ND ed.) at 2 AM August 5. Signal source was the local cable system which has antennas on the city water tank for the locals ..KJRR (7) (Jamestown ND ed.) was off ...and this stuff showed up." "(Note...the "5" on the CKY-tv tp is their Winnipeg cable channel.)" Thanks for the interesting DX photo Tom.

W25AA Onancock VA is a translator of WHRO-15 Norfolk VA but do to the affects of hurricane Emily, W25AA was picking up WPDE-15 Florence South Carolina at a distance of 331 miles after WHRO signed off. Thanks for the DX photos Joe.

It's a new year and time for and old reminder. When you submit your photos besure to include the following information about your DX photo: calls, channel number, city of license, state province or country, distance in miles, mode of propegation, date of reception, time of reception is optionally. Some other tidbits you can add about your photos are; what the co-channel interference (CCI) is from, local or semi-local stations your DX catch had to over ride (include distance).

Till next time **DAVE**

January 1994

Deadline: January 5

November E-skip is the big event of the month. The best day was November 20th. Some DXers were able to squeeze some tropo from the troposphere. A new record for the shortest report is featured this month. I don't know if anyone can reclaim the record, how do you have less than one station to report?

## Dave Nieman - Ho Sta Geh Road - Rock City New York

Equipment: RCA 19" (model AER 191 W) b&w TV, Channel Master 3617B VHF antenna at 15 feet AGL (2405 feet ASL), on a Radio Shack rotor, Belden RG-8 coax feed into a Winegard FT-7600 FM trap (set to 95.7MHz) and Winegard DA-205 distribution amp. Antennacraft P-7 (7' dish) UHF antenna into a DX Tele Labs EU-4S preamp at 25 feet AGL (2415 feet ASL) on a Alliance U-100 rotor, Jerrold CAC-11 coax feed. New loggings are underlined. New call {KKKK}.

October 1993

29 Tr 0310 WWNY 7 NY  
WKBW Buffalo NY off

November 1993

192 Tr 1100 WLIG 55 NY 297

I started using my circa 1980 19" RCA (model AER 191 W) b&w TV from the Akron DX shack. I'm now seeing some fair troposcatter on UHF out to around 300 miles. I tried using the Harvard receiver/monitor with the Teknika TV tuner at home; it's not even a good monitor. Wish I would have bought two of the RCAs. Dave

## Dave Nieman - 12284 Nice Road - Akron New York 14001-9529

Equipment: RCA 19" b&w TV with Teknika 6510 tuner, Channel Master 3617B VHF antenna on a CDE rotor at 23 feet AGL (813 feet ASL). Channel Master 4251 UHF antenna (7' dish) into a Blonder-Tongue CMA-Ub preamp on a crank up tower at 33 feet AGL (823 feet ASL) with Alliance HD-73 rotor. Using Jerrold CAC-11 coax for both antenna. New loggings are underlined. New call {KKKK}.

30 roof antennas came down for  
new roofing, more antennas are  
planned, the farm will grow!

Comments: Hurricane Emily DX from Baltimore was with limited  
antennas up, just a 2 foot corner reflector and RDX amp. I was  
down to the Outer Banks of NC while visiting the Virginia Beach  
ham-fest on October 1st.

Comments: 11/13 Atlanta was in steady but on the weak side.  
The 11/15 opening was snow free. Florida was probably in but I  
had a 6 1/2 hour drive from NC to PA the next day so I didn't check  
the ICOM. WFMZ-69 in Allentown, PA is much stronger now. I  
noticed the Ch. 42 in the Vineland, NJ area with spanish cartoons  
one morning. The new Ch. 40 in Wilmington, DE is transmitting  
from Boothwyn, PA with their TBN nonsense. They are about 4 miles  
away so they are the strongest local now. WTGI-61 interference is  
worse now due to a mixing of their signals. Why doesn't TBN have  
a toll free number on the screen? They seem to have plenty of  
money to build stations, why do people have to make a long distance  
call to them. I would like to complain to them for free. WCMC-40  
tears up the frequency but it's better to have TBN on an already  
un-DXable channel.

Richard Contone, 162-07 87th Street, Jamaica, N.Y. 11414

Comments: I am using the same amplifier that brought good  
loggings all summer. (What is the brand name and model number? sw)  
The amplifier is at the focal point of my homemade parabolic antenna.  
(How many feet off the ground is the antenna mounted? sw) I am send-  
ing for QSLs and I have received many interesting responses.

# WESTERN TV-DX

Fred McCormack  
PO Box 65666  
St. Paul MN 55165-0666

(612) 735-6860

Deadline: 02-10-94  
Cut-off: 11-01-93

January 1994

The TV-DX highlights in November were a nice tropo opening on the 18th noted by Delaney, Eckberg, and yours truly (finally!) and E skip on the 20th noted by Kruszka to New York and by Delaney to New Brunswick/Maine/Massachusetts.

**CORRECTION** - Robert Kramer advises that he erroneously reported W48AV with TCT in his report appearing in the October 1993 column. W48AV is on The Family Network.

The tropo on 9/16-18 was the best opening I never saw. I appeared to be on the eastern fringe of the opening. I mostly just got audio on the R-7100. Niel Kazaross just 10 miles or so from here, but further west, was getting color pictures. It still was a fantastic opening, my first ever tropo to TX, and my mileage records were shattered. I

Robert Kramer (continued) started back to work in July, so not as much DXing done. I am changing jobs again. I am going back to my old employer, the State of Illinois. It is real easy to get days off when cx are up. 73 de RK.

Keith Smith, 3924 Sims Ave, St. Ann MO 63074-1926 (314-429-0751)

2328	WPSDt 6 KY		unid channel 12				
	( See Note # 1 )		( See Note # 3 )				

Note # 1 - Coverage of a basketball game. "Kentucky" on banner. Could this be Kentucky State? WSIL-3 in during same period - almost a grade B signal!

Note # 2 - Carrying "CBS News with Connie Chung". Logged in again at 1800 with "Wheel of Fortune". (Does that check right? Terre Haute is on the eastern Central Time Zone border, so I don't know. Most CT VHF's air news at 1800.) WSIL-8 and KFVS-12 both in colour with clear grade B pix. KRCG-13 in with a colour picture - first time in awhile. (It's gotta be the snow!)

Note # 3 - Could be KIIN or WILL.

Note # 4 - Extremely rare. This PBS does not adequately serve the Columbia - Jefferson City, Missouri market and it's the only PBS within 75 miles of that market!

On the 28th, I logged a unid on 64 - possibly East St. Louis area (very snowy) - carrying Valuevision. Any calls for this one? (Call letters are K64DT. It is licensed to St. Louis with transmitter at One Mercantile Center. fm)

(Welcome to Western TV-DX. We hope to hear from you regularly. fm)

In my November 1993 Northern FM DX report, I mentioned hearing a station on 90.1 possible a WKSU Kent Ohio satellite. Well it turned out being W211AL 90.1 Ashtabula OH a translator of WYSU 88.5 Youngstown OH. On October 31 I thought I relogged WMBI 90.1 Chicago; this one turned out being a translator for then on the same frequency. The mountains along the signals path must make it scatter in and out. It gives you the impression that your hearing a more distant station. I had to do some fine tuning of the FM trap to hear CJOJ 95.5 Belleville ON next to local WPIG 95.7. CJOJ and WPIG are both on the same antenna heading. Dave

## DAVE NIEMAN - 12284 NICE ROAD - AKRON NEW YORK 14001-9529

Hurricane Emily produced some of the best FM DX I've ever heard. It produced INCREDIBLE signal strengths. Washington D.C. stations were stronger than 50 kw stations 25 miles away in Trenton. WBIG in D.C. was way over semi-local WPLY in Media, Pa. WLAN 96.9 in Lancaster was so strong I would have thought they were 10 miles away.

There has been quite a bit of off season E-skip this year. Does it seem to anyone that this happens a lot after a mediocre or poor Es season, while after good Es years there is not much skip? Another oddity that I have noticed is that each opening I have heard has been on a Saturday! (Only two have it FM so far but I have seen some more TV openings). See the e-skip summary somewhere in this issue, it turned out to be a mediocre year overall, but with abnormally low numbers of days with FM skip. For me personally, it was quite a good year; I guess I was lucky to be around at the right times. There weren't a lot of openings, but the few that I did have were very strong, sometimes easily overriding many locals with phasing. June was excellent here, but May and July were a disappointment, especially May. Tropes have been somewhat disappointing for the most part this year. There has not been any opening at all of any significance since the big openings to WI, MI, IN, and OH at the end of August, until last night (December 14). I am told though that we just missed very strong openings that affected the midwest in mid-September. We have not had enough stable, high pressure systems building over us to allow any decent tropo to set up. The highlight of 1993 has to be the 779 mi. FM tropo to Jefferson City (KJMO 100.1) on June 17th, after just four hours earlier logging 1709 mi double hop FM to Monterrey, Mexico (Hi Fernando!) Thanks Matt Sittel for sending lots of logs!

## STATION NEWS:

**NORTHEAST:** In Avalon, New Jersey, WWOC 94.3 changes calls to WRDR, and is going classical. In nearby Delaware, WYHH 92.9 Smyrna is on the air. They relay WDOV 1410 Dover, which runs a news/talk format. And in Baltimore, WVRT 104.3 has begun to simulcast cross-town WWMX 106.5 'Mix 106.5'. In nearby Bethesda, Md., WLTT 94.7 is no more. They are yet another 'Arrow' station, WARW 'Arrow 94.7' which stands for an 'adult rock and roll' format. They are supposed to do this until January 1, 1994, when they will debut a new format. In the New York Metro area, some changes have occurred. WMRW 98.5 Westhampton, on Long Island, is on the air. They relay WDRE 92.7 Garden City, which is modern rock (WDRE also has a relay in the Philadelphia area by the way: WIBF 103.9 Jenkintown). There is some new from farther up the coast, in Maine. WHTT 107.5 has reportedly gone to a 'hot country' format, no word on any call change. WHQO, 107.9 in Skowhegan, has switched from oldies to light rock, with the slogan 'The light at the end of the dial'. WTVL 98.5 Waterville-Augusta has changed to a country format and 'B 98.5' (be careful, there are several stations with that slogan on 98.5, but as far as I know WTVL is the only one that is country). They have yet to change calls to reflect their new slogan. WCTB 93.5 in Fairfield, Me. is on the air, so far with just Christmas music, no word yet on what they will run afterwards. Rich Gallison says they will be happy to QSL, via WTOS 105.1 Skowhegan, who owns WCTB. WPME 95.5 Topsham, Me. is on the air and stereo, with country music. They are simulcasting with WCME 96.7 Boothbay Harbor.

**SOUTHEAST:** WKNF 94.3 Oak Ridge-Knoxville is back on after a long silence, with country oldies. WNWS 101.5 Jackson, Tenn. has signed on the air, with a news/talk format. It apparently is not parallel to the AM station in Memphis with the same calls and format. Speaking of the Memphis area, WYYA 95.7 Olive Branch, Ms. has reportedly signed on the air with new rock music. Just north of there, 101.9 in Central City, Kentucky becomes WQXQ, with a top 40 format. In the Carolinas, WKVS 103.3 Lenoir, NC is on the air. They are 'Kicks 103.3', and country. WTHP 98.3 Thomaston, NC goes to a Christian adult contemporary format. WMFX 102.3 in St. Andrews-Columbia is moving more in a classic rock direction. WYAV 104.1 Myrtle Beach, which recently added Howard Stern's show, has now gone classic rock. Moving to Alabama, two 98.3's in that state have changed format. WDLT Chickassaw-Mobile has gone urban 'Smooth 98.3'. And farther north, WAGH Ft. Mitchell-Columbus (GA) is now urban adult contemporary. Back in the Mobile area, WNSP 105.5 in Bay Minette is on the air, as 'News/Sports 105.5'. Some news from Mississippi this month as well. WIZK 93.5 in Bay Springs has become country, as

**Southeast cont:** 'I-93, Real Country'. WBAD 94.3 in Leland has LMAed a station in Greenwood, though we are not sure which. The stations are urban. WSSI 98.3 in Carthage is operating in mono. Two stations in MS are using the 'Classic 102' slogan. WWSL 102.3 Philadelphia, an oldies station, uses that, as does WAGR 102.5 in Lexington. WHLV-FM 102.5 Ellisville-Hattiesburg is 'Love 102.5'. WKNZ 101.7 Collins, Miss. is back to a country format. In Georgia, WMGB 93.7 Jeffersonville-Macon has come on the air, with a top 40 format. Moving down to Florida, WKGT 105.1 in Century is silent. WJED 91.1 in Dogwood Lakes is operating in mono. WTGF 90.5 in Milton, Fla. is on the air now, mono, with a gospel format. DeFuniak Sps. 103.1 is WLGH, 'Light 103.1, the jazz station'. WNCV 100.3 Niceville-Fort Walton Beach is on, 'The Emerald Coast's New Love 100.3', soft AC format. WOWW 107.3 Pensacola is using 'The New Wow 107.3'. Another panhandle change, WPFM 107.9 Panama City goes modern rock, as '107 Dot 9'.

**MIDWEST:** WZXA 104.7 Sturtevant-Milwaukee is on with AC/oldies, 'Sunny 104.7'. WDKM 106.1 Adams, Wisc. is on with country. WMLI 96.3 Sauk City goes to a 'rock/AC' format. 107.1 in Fond du Lac, Wisc. changes calls to KFIZ-FM. In Michigan, I heard WKJC 104.7 Tawas City bragging 'also on 94.9' Perhaps this is the new WKJZ Hillman'. In Illinois, WDBR 103.7 Springfield goes to hot/ac, 'Variety 103.7'. In Oklahoma, 106.9 Muskogee changes to KHTS, to reflect its 'K-Hits' slogan. In the same Tulsa market, KCMA 92.1 Broken Arrow, classical during the day, adds modern rock at night.

**WEST:** In Texas 91.7 Austin has been assigned two sharetimers, KOOP, a Pacifica station, and KAEM, an alternative station at U of Texas (who wants different calls, KVRX perhaps, so they won't sound like calls that belong to rival Texas A&M!). KRQA 99.7 in Amarillo is on, with a/c. KDSQ 101.7 Denison goes to an AC/oldies format. 98.3 Pleasanton/San Antonio becomes KBUC, classic San Antonio calls, and a country format. KLTR 93.7 Houston is no more, now KKRW, 'Arrow', for adult rock and roll. In Corsicana, 107.9 goes to a Spanish Tejano format, 'Kick', and KICI. In the Los Angeles area, 98.3 West Covina changes calls from KBOB to KMQA, Spanish and 'La Maquina'. KTMN 98.5 in Los Alamos-Albuquerque is on, with classic rock, 'The Mountain'. In Montana, top 40 KBOZ changes frequency from 93.7 to 97.5. 93.7 is now KATH, and country, with a 'Cat' slogan. Thanks to the following people for assistance with *Station News*: Doug Smith, Matt Sittel, Dave Nieman, dBruce Hall, Tim Noonan, Paul Mount, Rich Gallison, and Rich Shaftan. Oh I forgot to mention some changes, 106.3 Mt. Kisco now WMJU, ac simulcasting WMJV 105.5 Patterson. WWKS 106.7 Beaver Falls-Pittsburgh to hard rock 'The Force'. No call change has occurred as of yet.

## JAPANESE VS. AMERICAN-MADE CAR FM TUNERS: BETTER DX SIGNAL PERFORMANCE IN THE NISSANS?

When I purchased my 1990 Plymouth Horizon with its stock sound system I noticed that the radio's selectivity was better than that of the C.E.I. brand that I had in my 1973 Duster the last few years I had it. However, I found that the stereo in my girlfriend's 1991 Nissan, which is a "Clarion," is another step up. Parking both cars in the same spot in front of our house, I tuned to several stations with severe adjacent channel interference problems, to compare reception. The first test was WESM on 91.3, about 95 miles away sitting next to WBJC at 30 miles. It had some splash on the Nissan but was worse on the Plymouth. Next up the dial was WFOG on 92.9, sandwiched between local WMJS and WPOC. It came in weak and clear on the Nissan with slight splashing, but was inaudible on my car tuner. Then I tuned to WRVQ on 94.5, and as before could not be found on my car tuner but came in with a little interference on my girlfriend's. Both sets received WMDM (97.7) perfectly. Next was Baltimore's WVRT on 104.3 which sits next to WXTR in southern Maryland. The Nissan had no interference, but the Plymouth suffered from moderate splash. The I tuned WARX on 106.9, which is next to local WJFK. It could barely be heard on the Horizon, but came in with some spillover in the Nissan. In checking for sensitivity I noticed another difference. In tuning for WKMZ from the West Virginia panhandle, both sets pulled in a reasonable signal, but on the older set WPST in New Jersey could also be heard. Similarly on 107.7 the Plymouth pulled in a second station behind WRCY. I drove the Nissan to work one day and found the difference in selectivity evident while moving also. For example, when moving south on the Baltimore-Washington parkway the Nissan gets WMMX (106.5) 3 miles into D.C. before WJFK starts to cut in, while the Plymouth allows splash 4 miles earlier. In summation the Nissan set is unreal, and it is scary to think what it would do with filter modification. It should also be noted that the Nissan set is similarly superior on the AM dial.

--Gus Mancuso

\* VERIFIED.

COLUMN DEFINITIONS: are as follows: Total = Total number of FM stations logged from DXer's location (All loggings should be received within 25 mile radius of this location to count.) Freq. changes count as a station, call letter changes DO NOT count. Also count a station only once regardless if logged by different propagation modes. 88-92 = All stations logged from 88.0 to 91.99 Mhz. Es=Total number of stations logged by E-skip. MS=Total by meteor scatter. Au=Total via Aurora. USA=Total number of states and the "+" = Washington, DC. CN=Number of Canadian provinces logged. MX=Number of Mexican states logged. FO=Number of foreign countries, but not Canada/Mexico. TPU (Total number of political units)=Sum of USA CN MX and FO. YB = The year you began DXing from this location. Other groundrules for computing log totals are included in AUGUST 88 VUD Page 48. Note: Now is the time to update and submit your latest stats to keep on the Scoreboard. Also submit any distance records, states stats and personal best statistics. Send via E-mail if you have computer/modem. Laserjet printouts of personalized DX distances covering FM/TV North/Central America and Caribbean cites (database=5165), with choice of miles or kilometers, are available for only \$2 donation. Include your DX location and grid coordinates with your order. 73...Fred.

I'd like to thank all of you who contributed to this column. And encourage those who haven't; to send in your TV stats, records and totals. As you can see, there are some records and totals that go unclaimed. Now's the time to check that TV log; you may have a record in there. When you send in that record logging be sure to include: channel, propagation mode, call letters, state/province or country, city of license and your calculated distance. When you send in your country/provinces/state totals; we're counting it by city of license not transmitter location.

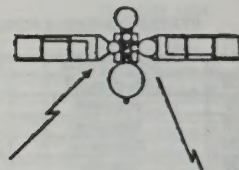

I'm indebted to "TV NEWS" column editor Doug Smith for unselfishly sharing his distance calculation computer program. It made verifying distances so much easier.

*Dave*

# SATELLITE NEWS

And now the 1994 yearly review of what's up in the sky. The video services are as accurate as I can be as of mid-October 1993. Many audio sub-carriers have been revised, but due to lack of time for monitoring, a number of SPCP items need to be updated. I hope that what follows is of some interest. One new item is the listing of Digital Video/Compression services. This is not really verifiable as equipment for domestic consumer use is not yet available.

SATELLITE NEWS ANNUAL REVIEW OF SERVICES

TO BE CONTINUED NEXT MONTH!

# ANTENNAnotes

by Dr. Feedpoint

The most important single part of any VHF weak signal receiving system is the antenna. This is something that far too many DX enthusiasts don't seem to properly "grasp." Most of you out there probably got to the TV and FM side of the DX'ing hobby by way of the Shortwave bands...and those bands are a "way cool" place for long distance reception. All you have to do is string a piece of copper wire across the yard, pick the appropriate frequency bands, turn the radio on, and you'll easily hear worldwide DX in one night! If you get more "into it" you may want to cut a half-wave dipole for the band(s) of your personal interest. And that's about all you ever need, unless you decide go for a "gain antenna" such as a yagi, or quad, usually only used by amateur radio operators.

But when you get up to VHF (30 to 300 MHz) and above, things are different. Way different. So different, in fact, that it means that the successful TV or FM DX fanatic must also be something of an "antenna buff." That piece of copper wire that works so well receiving the world at 15 MHz is nearly useless up on channel 13, and forget about using it to seriously chase 700 mile tropo ducts on 100.3 MHz.

If you want to know how to pick and choose (and install) commercially available TV and FM antennas that will make for the best DX results in your location, then this series of columns is for you. These are being written in late 1993 for publication in the VUD in 1994. As of this writing, antennas for TV and FM are still commercially available for decent prices, sometimes even sold by WTFDA members (watch for their VUD ads) at very reasonable prices. Don't believe that pimple-faced idiot at the local Radio Shack who may try to convince you that the major manufacturers such as Channel Master, Winegard, General Instrument, etc. no longer make antennas. The quality stuff is still available, albeit a bit harder to locate in this age of CATV, VCR, and just plain consumer ignorance about how to receive anything but a Domino's Pizza from a long distance.

Since you are already a WTFDA member you probably already are something of an authority of the local and regional stations in your area, and you probably have a good idea of what kind of equipment is needed to pick them up. If so, then congratulations to you—that makes you "one up" on your neighbors, who probably have nervous breakdowns whenever the local cable TV company have an outage, depriving them of the thrill of watching that local TV station from 3 miles away.

TV and FM DXers need to know some basic antenna concepts in order to make the right choices. We don't want to go too deeply into theory here—there are plenty of good references, which we'll suggest in a later column, for just that purpose. We're going to try to also answer some of the more frequently asked antenna questions (Example -- Q: Can I use my C.B. antenna with a low-noise pre-amp to DX UHF TV? A: Not unless you're a real die-hard optimist, Bubba.)

The main mission of the feature is meant to be education. I'm out to tell you stuff you need to know about your antenna. What kind of antenna do YOU use? I notice some members report using rabbit ears. My advice: lose 'em -- even a couple of shower curtain rods can be made to work better than them, or better still, a simple quad loop made from bell wire or lamp cord for pennies. I'm going to devote a column or two, or three to such simple homebrew projects for those of you who can't or won't put something up on the roof.

There's a lot of "hokum" about antennas out there. Everyone wants to know "which antenna works best?" There's no easy answer to that one. I've found that it all depends upon the needs of the individual DXer. The antenna that works best in a stacking situation often is not the best one to use in "single-bay" configuration. Some of the models I notice DXers using have TERRIBLE front/back ratios. Many DXers appear to ignore the value of a good low-loss feed line (or "lead-in" as some call it.) And...wait 'til you hear some of the things you don't know about the importance of antenna height. It will be enough to make you want to move to the nearest hill. Height often beats higher gain antennas, in many, many "real-world" situations. I promise to try to cover these, and many other topics in forthcoming installments!

Next Column: My Antenna is Bigger Than Yours, or "It's Not How Much, It's How Many Times That Count." We're talking about the dB here folks. Don't get so excited.

---

**EDITOR'S NOTE:** Dr. Feedpoint is a CET who works for a midwestern U.S. firm installing LAN networks, MATV/SMATV systems and TVRO systems. He's not really a Doctor, his name isn't really Feedpoint, and he says his boss will kill him "if he finds out I'm writing this stuff on company time."
